Sites Gone’ is a site that had no sprouts or regrowth at time of visit. We continue to monitor and treat depending on the species. Sites Treated includes multiple treatments at some sites. 10ft x 10ft is equal to 0.002 acres or 5ft x 20ft. Gross Acres is the size of a pretend rectangle around the margins of the site, a way to delineated the "site". Net Acres is gross acres times the percent cover for a species. In other words how much of the above 'rectangle' is covered by the weed, 10x10 at 50% cover is 0.001 acres. Treated Acres is net acres times the percent of the patch treated, most are 100%. Some sites are only a few plants and are not reflected in the treated acres.
2021 Noxious Weed Sites Inventory

Legend

2021 Priority Weeds Visited

Weed
- Himalayan/Japanese Knotweed
- Jubatagrass
- Spanish heath

Status
- Gone
- Treated

State/Federal Ownership
- US Bureau of Land Management
- US Forest Service
- US Fish and Wildlife Service
- OR State Parks

Prepared by: Erin Minster, Curry SWCD, 2/22/2022
Prepared for: Curry Weed Advisory Board & Curry Watersheds Partnership
