Total sites visited may include repeated visits to the same location, but most are once a year

Sites Gone' is a site that had no sprouts or regrowth at time of visit. We continue to monitor and treat depending on the species.

Sites Treated includes multiple treatments at some sites.

10ft x 10ft is equal to 0.002 acres or 5ft x 20ft.

Gross Acres is the size of a pretend rectangle around the margins of the site, a way to delineated the "site".

Net Acres is gross acres times the percent cover for a species. In other words how much of the above 'rectangle' is covered by the weed, 10x10 at 50% cover is 0.001 acres.

Treated Acres is net acres times the percent of the patch treated, most are 100%. Some sites are only a few plants and are not reflected in the treated acres.
